A school canteen to support 500 children
For the academic year 2022-2023
Fond 'ouie & Cormier

July - 2022

ROLDYNA LES PETITS TRESORS

PROJECT TITLE	A school canteen for 500 children
Presentation of the school	• Nom: ROLDYNA les petits trésors • Date de creation: Septembre 2008 • Zone: Fondwa et Cormier 10ème et 11ème section rurale de Léogane • Public cible: Enfants de 3-18 ans • Une école préscolaire, Fondamentale complète et Secondaire
Introduction	Chronic malnutrition is a problem linked to poverty. It has repercussions on schooling: parents with very low incomes are faced with the dilemma of choosing between schooling or feeding their children and sometimes decide not to send them to school, in order to be able to feed them. The target school canteen program, through additional action. Roldyna which is located in Fond 'oie, location of the project, the children will also benefit from a balanced meal every noon, at the school canteen organized by ROLDYNA. This provides the basic foods that are rice, vegetables and meat, This initiative thus combines the pleasure of learning and sharing a meal with their classmates, contributing to the intellectual and physical development of children. She will succeed in making the school a place of conviviality that produces social ties, especially with parents. They no longer have to make this difficult choice for their children and are all the more motivated to send them to school
Justification	Emphasizing the undeniable role of education in individual development and the transformation of societies, the Haitian state, upon its accession to independence, set itself the goal of 100% schooling. But, over the years, several factors including uncontrolled demographic growth, the weight of tradition and poverty have tempered the optimism of universal education. The purpose of school canteens is to contribute to the dynamic of educational development by promoting equal opportunities, keeping children in school, and democratizing school. In addition, beyond the simple function of feeding, school canteens can integrate a development and poverty reduction component.

	In ROLDYNA's intervention areas, some residents live in conditions of extreme poverty, these destitute children and adolescents who leave school, these parents do not have the opportunity to meet their needs. It is with this in mind that the ROLDYNA management has taken the initiative to give children a hot meal every lunchtime.
Project interest	• healthy and nutritious food and education help children poor people to break the cycle of poverty. • school meals attract children to school. • school meals help children concentrate, better learn and perform better, which allows them to successfully complete more years of schooling. • Immediate reduction in hunger • Encourage the schooling and attendance of learners
Goal of the project	Provide at least one balanced and complete daily meal for school children. • Alleviating the nutritional deficiencies of children in the cormier and Fond'oe zones • Attract as many children as possible to school.

Results	Addressing nutritional deficiencies through school canteens allows these children to grow up in better health and to follow normal schooling. You only have to see their enthusiasm in class to understand how much they appreciate being able to go to school. By meeting the nutritional needs of the students, we will quickly notice a greater attendance and a better concentration on their part. moreover, academic results and school attendance will have increased. This project will also help reduce the rate of malnutrition in Fond 'oie and Cormier.
Target group of children	ROLDYNA works with children from 3 to 18 years old in the Fondwa and Cormier rural sections, especially poor children, for this year we plan to distribute 500 dishes per day which gives 2500 dishes per week, or 10,000 per month, for the 10 months this year. which will give 60,000 dishes for the year.

Canteen menu

Multiple blends intended to develop a balanced menu typically include the following:

- a staple energy food: staple food corresponding to a cereal (millet, rice, corn).
- an additional food rich in energy: vegetable oil, fat, sugar.
- a food rich in protein: milk, egg, fish, meat, peanuts, cowpeas, beans, lentils, peas.
- a food rich in micronutrients (vitamins and minerals): fruits and vegetables.

Vegetables, fresh green products and local fruits or dried vegetables such as that peanuts must be purchased by communities.

BUDGET

The cost of a dish is **US \$ 0.60**

Number of dishes per day is: **500 dishes**

Number of dishes per week: **2500 dishes**

Number of dishes per month is: **10,000 dishes**

For the 9 months: **September 2022 - July 2023: 90,000 dishes**

90,000 dishes * US 0.60 = US \$ 54,000 for 500 childrens for nine months
